SUMMARY

Founder of a profitable marketplace e-commerce business scaled to \$1.7M in annual gross revenue within 2 years. Experienced in leading 0-to-1 product development and executing disciplined, data-driven go/no-go frameworks for product decisions. Strong technical background building AI tools to support business growth. Seeking a Product Manager role to bring a builder's mindset and data-driven approach to creating better products.

SKILLS

Python, Scikit-Learn, SQL, Git, GCP, Docker, RAG, LLM, Prompt Engineering, Embeddings, Generative AI (GenAI), Vector Database, Function Calling, A/B Testing, Terraform, Statistics, Product Analytics

EXPERIENCE

Pasi Products LLC

Cary, NC, US

Founder

03/2022 - Present

- Developed a RAG-based chatbot that reduced Amazon market research time from 2+ hours to <30 seconds.
- Built and shipped a launch success detector to filter out losing products before launch, improving precision from a 10% baseline to 30% and delivering 3X ROI per \$10K invested.
- Scaled an Amazon retail business from \$0 to \$1.7M in gross revenue in 2 years through pricing, sourcing, and automation improvements.

Product Launch: Cozzea

- Launched a female clothing brand, a separate branding effort under Pasi Products umbrella.
- Defined product concept and target persona through customer discovery, competitor analysis, keyword analysis, and Reddit sentiment analysis.
- Led a 2-person marketing team to establish go-to-market strategy; tracked and measured key KPIs at each marketing funnel step; generated 1,000 pre-launch email signups and 5 social-proof reviews.
- Made a no-go decision after post-launch CPA exceeded the pre-set benchmark of 30% of unit price.

Vertex Pharmaceuticals

Boston, MA, US

Senior Scientist

08/2021 - 03/2022

- Owned cross-functional sign-off from Clinical and Toxicology teams on bioanalytical assay ranges for FDA-regulated animal and human studies.
- Led junior scientists through method development, owned method transfer to external CROs, and reviewed analytical reports supporting the FDA submission package.
- Coordinated across multiple departments to secure raw material and biological samples to keep study timelines on track despite multiple external dependencies, keeping study delivery time under 1 month.

Scientist

06/2019 - 08/2021

- Automated sample preprocessing process, cutting time from 2+ hours to 30 mins; developed analytical assays to support 5+ clinical studies with <15% variation and bias across FDA parameters.

PROJECTS

LLM-Based Job Recommendation Dashboard

06/2026 - 07/2026

- To eliminate hours of manual job screening, built an LLM-based system that scrapes and scores job listings for candidates targeting Product Manager roles; ran controlled model evaluation experiments and selected DeepSeek as the final model, cutting cost per API call by 90% while maintaining comparable accuracy and latency.
- Cut job-screening time from 2+ hours daily to ~30 minutes while surfacing the highest-fit roles.

EDUCATION

University of Colorado Boulder

MS in Computer Science

Boulder, CO, US

09/2025 - 10/2026 Expected

University at Buffalo

PhD in Chemistry

Buffalo, NY, US

09/2014 - 06/2019
